JC17 Rec'd PCT/PTO 25 MAR 2005

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims

in the application:

Listing of Claims:

1. (Original) A wind power installation comprising a plurality of

installation parts such as rotor, generator, machine casing and pylon, wherein the

installation parts are disposed in a container during transport to the building site of the

wind power installation and are assembled to form a wind power installation at the

location of construction of the wind power installation, wherein the container is such that

it accommodates the pylon of the wind power installation and forms the foundation of the

wind power installation.

2. (Original) A process for the production of a wind power

installation comprising a plurality of installation components such as rotor, generator,

machine casing and pylon, wherein the individual installation components are transported

by means of a container or a plurality of containers of standard dimensions to the

building site of the wind power installation and the container or containers are such that

they accommodate the pylon of the wind power installation and form the foundation of

the wind power installation.

3. (Currently Amended) A process according to claim 2

characterised characterized in that the foundation container or containers are sunk into a

hole in the ground prior to setting up the wind power installation.
